TITAN	\$3.50; 3 for 9.00
YEOMAN	2.00

To those acquainted with Dominion and its seedlings, it is unnecessary to say that all in the above list are of transcendent beauty. Bruno and Dominion are not as rapid in growth as the others, but with a little special care will prosper in any well-kept garden, with good drainage. No race of irises has ever created the sensation in the iris-world that was caused by Dominion and its offspring listed above.

OTHER NEW VARIETIES

Besides the new Dominion Seedlings described above, we take pride in offering the following new varieties, not described in our catalogue. Orders for these and for the new Dominion Seedlings will be filled in September.

CHASSEUR (Vilmorin 1924)—Clear straw-yellow. Falls purplish-red at base. A European novelty in great favor. Fine for garden effect.	2.50
CITRONELLA (Bliss 1922)—Dark yellow, in great demand. Said to be the best yellow produced in England.	5.00
DOROTHEA K. WILLIAMSON (Williamson 1918)—Hybrid of the beardless species Fulva and Foliosa. Large velvety flowers of vivid purple. Fine for cut flowers. Requires a moister situation than bearded iris.	1.00
DUKE OF YORK (Perry 1925)—Very large flower of perfect form. Mauve-blue. Plant very tall.	2.50
EVADNE (Bliss)—Strong grower, good height and fine poise, and remarkable for its color, which is, in general effect, a light violet-rose and crimson-lilac; very difficult to describe.	10.00
GERMAINE PERTHUIS (Millet 1924)—A magnificently-colored iris of Souv. de Mme. Gaudichau parentage. S. Violet-purple; F. deep, rich Bishop's violet. Deliciously scented and of unequalled satiny texture. Last year many considered it the outstanding variety to bloom in this country. 3 feet.	10.00
JULIA MARLOWE (Shull 1923)—A stately flower with Chinese-violet standards and raisin-purple falls, producing a glowing pink and red effect in the sun. Extremely large flowers; fragrant; 3½ feet.	6.00
COPPERSMITH (Shull 1926)—One of the most finished irises known. S. purple-drab at tip, blending downward to cinnamon-drab. "Falls with mahogany-red reticulations on haft merging into solid Indian Lake, passing to dahlia-carmine." A magnificent iris. Most sensational.	14.00
GOLD IMPERIAL (Sturt. 1924)—Yellow self of fascinating, bright, clear coloring. Ranges in both S. and F. from empire to lemon-chrome yellow. Orange beard. Medium size flower on strong 3 foot stalks. Deeper in color than Shekinah and darker than Primrose.	6.00
IMPERATOR (Cayeux 1923)—Very large late-flowering bi-color. Cupped standards; straight-hanging falls "of Matthews to raisin-purple, shading white at haft, with red-brown reticulations".	3.00
L'AIGLON (Shull 1926)—Type of Ambassadeur, but redder toned and with broader falls. S. Livid purple; F. almost a pure red, with darker velvety reflexes. Large flowers. Over 3 feet.	15.00
MME. DURRAND (Denis 1912)—S. iridescent cinnamon-buff, flecked lilac. F. old-gold flushed lilac. Stalks well branched. 5 feet. Slow grower in some sections and should be planted in a protected location, but is well worth special care.	3.00
MAORI PRINCESS (Shull)—Richest colored of all variegatas. S. Empire yellow. F. burnt Lake richly bordered with Empire yellow. Aristocratic form. 30 inches. This was illustrated in colors in Mr. Wister's article in May, 1928, Ladies Home Journal.	5.00
PEA ROUGE (Cayeux 1923)—S. coppery-red; F. violet-carmine. Considered one of the very best red-toned varieties of French origination, and very much sought after.	3.50

SEQUIOIAH (Shull 1926)—"Of Ambassadeur type, but richer colored; large-flowered and tall. S. Light Vinaceous Lilac at tip, blending downward to tawny Olive near the base. F. Pansy-purple, shading to velvety Blackish Red-purple, narrowly bordered Purplish Vinaceous. In texture the standards give one the impression of shot silk and the falls of rich velvet. A splendid combination of good qualities derived from Julia Marlowe and an unnamed seedling of the type of Iris King. Among the best." (Introducer's description.) Shown in color in May Ladies' Home Journal.	12.50
SOUV. DE LOETITIA MICHAUD (Millet 1923)—One of the most remarkable and beautiful of all irises. Self-colored lobelia-blue, shading paler towards edges of petals. Tall and free-flowering on well-branched stalks. 4 feet. Needs good drainage and a protected location.	8.00

SUNSET (Denis 1919)—A flower of wonderful coloring. S. Yellow-buff, or old gold, finely arched. F. coppery yellow suffused blue-violet in center, dotted brown at haft. Real pastel shades, yet very bright. Strong grower, free-flowering, sweetly scented and very late.....	3.00
TROPIC SEAS (Shull 1924)—A sister plant to Morning Splendor and Julia Marlowe, but representing the blue extreme. S. Dauphin's violet. F. deep Mulberry purple to violet, giving a very deep blue-purple general effect, conspicuously lit up by the rich golden beard. Fragrant; a large flower on 4 foot stems, and splendid grower.....	6.00

Amazing advancement in the hybridization of bearded irises has been made both in Europe and the United States during the past few years, and concerning the results achieved, Mr. John C. Wister, president of the American Iris Society and an international authority on the subject, says in the May, 1928, Ladies Home Journal: "If people knowing merely the older sorts could see these modern varieties they would be astounded, and would never be happy until they had them all in their gardens."
